SUMMARY

Passionate about turning raw data into real business impact — with hands-on experience building end-to-end analytics and ML solutions across e-commerce, telecom, and job market domains. Delivered 3 production-grade projects across 100K+ real records — including churn prediction (ROC-AUC: 0.8338) and salary forecasting (MAE: \$34,885) — all live on Streamlit Cloud. Certified in SQL (Advanced) by HackerRank and Data Analytics by Deloitte Australia. Seeking a Data Analyst or Data Scientist role where I can contribute from day one.

EDUCATION

Bachelor of Technology in Computer Science and Business Systems , Vellore Institute of Technology CGPA: 8.14/10.0	2027
Class XII - Intermediate , Ignite Junior College Percentage: 93.1%	2023
Class X - Secondary Education , Dilsukhnagar Public School GPA: 10.0/10.0	2021

SKILLS

Programming & Query Languages: Python, SQL, R
Machine Learning & Statistical Modeling: Tools: Scikit-learn, XGBoost, Gradient Boosting, GridSearchCV, SMOTE, SHAP (Explainable AI) Techniques: Regression, Classification, Logistic Regression, Random Forest, K-Means Clustering, RFM Segmentation, Feature Engineering, Feature Scaling, Model Evaluation, Hypothesis Testing (T-test, Mann-Whitney)
Data Analytics & Visualization: Tableau, Power BI, DAX, Excel, Plotly, Streamlit, Data Modelling, KPI Development
Natural Language Processing: spaCy, NLTK VADER, Sentiment Analysis, Skill Extraction, Text Processing, Python-based NLP Pipelines
Business & Analytical Skills: Market & Customer Analysis, Financial Analysis (NPV, IRR, Ratio Analysis)
Web Development: HTML, CSS, JavaScript(Front-End Development)

PROJECTS

Brazilian E-Commerce 360° Analytics Platform Python · MySQL · Scikit-learn · Power BI December 2025
- Built end-to-end analytics pipeline on 119,143 real transactions — from raw ingestion to ML deployment and executive dashboarding - Delivered 4 ML models (RFM Segmentation, K-Means, Random Forest, Linear Regression) analyzing R\$13.8M in total transaction revenue - Achieved ROC-AUC 0.73 with 87% churn recall — proactively identifying 67,642 high-risk customers - Wrote 15 advanced SQL queries using window functions, nested subqueries and cross-table ML joins - Built 5-page Power BI dashboard with 10 custom DAX measures and live MySQL integration
Job Market Intelligence Platform Python · MySQL · Scikit-learn · spaCy · NLTK · Plotly · Streamlit March 2026
- Collected 929 live US job listings via JSearch REST API across 6 data roles - Built MySQL database and wrote 13 advanced SQL queries using window functions, CTEs and NTILE - Extracted skill demand and sentiment insights from 929 job descriptions using spaCy and NLTK VADER - Proved Data Scientists earn significantly more than Data Analysts via T-test and Mann-Whitney (p = 0.0000) - Tuned Gradient Boosting salary predictor with GridSearchCV — MAE \$34,885, R² 0.429 - Deployed 8-page interactive web app on Streamlit Cloud with ML inference and session-level usage analytics • Live App: https://job-market-charan.streamlit.app/
Intelligent Customer Retention System – ChurnGuard AI Python, Scikit-learn, XGBoost, SHAP, Power BI, Streamlit Feb 2026
- Built ML pipeline to predict telecom churn on 7,032 records — ROC-AUC 0.8338, F1 0.6225 - Applied SMOTE oversampling, feature engineering, and one-hot encoding to handle class imbalance - Compared Logistic Regression, Random Forest, and XGBoost — selected best model via ROC-AUC evaluation - Implemented SHAP explainability to identify top churn drivers — tenure, contract type, payment method - Deployed live Streamlit prediction app with real-time inference and interactive Power BI risk dashboard • Live App: https://customerchurnprediction-ohctytlm3cst3blssgwx.streamlit.app

CERTIFICATES

Deloitte Australia — Data Analytics Job Simulation: Analyzed manufacturing telemetry data using Tableau to identify machine downtime across 4 global factories. Developed an Excel classification model using nested IF logic to assess gender pay equality across job roles.
Tata Group — GenAI Powered Data Analytics Job Simulation: Completed practical projects involving exploratory data analysis, risk profiling, AI-based delinquency prediction, business reporting, data storytelling, and AI-driven collections strategy development.
HackerRank SQL (Advanced) Certification: Earned HackerRank SQL (Advanced) Certification, demonstrating expertise in complex queries, joins, CTEs, window functions, data analysis, and real-world database problem-solving to support data-driven decision-making.
